

User Stories: This project is my personal website, which includes: Academic background, Internship experience, Projects, Hobbies

Project objective: Help people (especially HR) know more about me. This project utilized HTML(structure design), CSS(style design), JavaScript with Bootstrap(for nav and user interactions) Instructions: Users are supposed to enter their name the first time they enter this website, it will remember recorded user thus next time this user enter this website the welcome interface will be different.

The Project structure is as follows:

Welcome title

Introduction

- Academic Background
- Internship Experience
- Projects
- Hobbies
- Recent project

User Instructions: The game at the end of this website needs user to click on the squares to play. It is an iframe website published on Replit: <https://andrewlao-shi-kuai-pao.hro1.repl.co/>
